

# Do you fancy walking this backwards?

We're thinking of mixing things up a little, to give you all a bit of variety and yet more great experiences. Walking into the sunset with the sun on your back.

For so many years the direction of the Across Wales Walk has been from west to east. Although its encountered a few tweaks along the way, the route has largely remained the same.

So how would it work?

- We'd go east to west, starting at the Anchor and finishing at Machynlleth
- The route would remain very similar, apart from the final bit where it would head into a grand finish in Machynlleth.
- You'd enjoy breakfast at Llandinam, lunch at Staylitle and tea at the farm.
- Each year we'd alternate the route so you get to zig zag your way across, year after year after year.

We'd love to know what you think
